TakeCare™

Health & Safety Training Software

- TakeCare needs no supervisor input allowing line managers to continue normal activity.
- TakeCare enables a company standard to be set and met.
- TakeCare provides a comprehensive evidence trail of the event.
- TakeCare elevates induction procedures & can be branded to your corporate identity.

A strong Health & Safety culture improves operational standards and demonstrates an Employer's determination to keep every employee safe and well. Making the assumption that new employees have a sound knowledge of Health & Safety principles and practice is a mistake, and the very reason why Health & Safety training is a legal requirement at all places of work. However, complying with requirements can be difficult.

Commercial pressures can delay training leaving both employers and employees open to the risk of accidents and injury claims.

Traditional methods

A supervisor is usually given the task of providing the Health & Safety training during the induction period. A checklist forms the basis of this, and ticks in the box are meant to prove that the subjects were covered. A signed acknowledgment that instruction was given is placed on file as proof of the event.

Traditional methods expose companies to unforeseen risks: -

- How knowledgeable are the trainers?
- How well was the instruction delivered? How will it be the next time?
- What was actually said to the employee?
- What did the employee understand of what was said?
- Can an effective training standard be guaranteed in a multiple location company?
- Would the employee's declaration help in defending a claim against the employer?

How does TakeCare differ?

- TakeCare was composed in modules from Health & Safety Executive publications; the content is therefore accurate.
- The delivery of the education doesn't rely upon the skill or mood of a presenter.
- TakeCare is computer based and has the capability to increase subject retention by up to 60% over tutor led methods.
- The content and delivery of TakeCare is consistent every time every where.
- TakeCare delivers 75 minutes of quality training in a user friendly media environment.
- TakeCare provides detailed performance reports for each student, location, company and group.

Benefits of TakeCare

- TakeCare needs no supervisor input, so line managers can pursue their normal work activity.
- TakeCare enables a company standard to be set and met, showing a uniform knowledge of Health & Safety across a workforce.
- The evidence trail of the event is comprehensive and will reduce the legal costs associated with defending speculative compensation claims.
- The multi media design of TakeCare elevates company induction procedures and can be customised to create individual corporate branding.
- TakeCare is the most efficient and least costly way of providing this essential training.
- Trouble free implementation
